

# PRO PULL Complete

Precise Dent Pulling

Designed to:

- Lower Cycle Times and Labor Costs
- Repairs Dents vs. Replacing Panel

The Pro Pull Complete utilizes the All New PR-3 Auto to generate the precise - High Power/Low Weld time needed to prevent damage to the corrosion protection on the backside of the panel. The PR-3 Auto senses when a weld tip or pull key have made contact and welds automatically after a short delay. The Auto feature is quick and user friendly due to the fact that it does not weld instantly like other higher priced systems on the market. The Pro Pull Complete has all the accessories that you will need to make the repair fast, large or small.

**PRO SPOT**  
QUALITY WELDING SYSTEMS

## Auto Weld Feature

The T Dent Handle is used with Auto Welding. With the turn of wing nut, all electrodes are compatible with the T Dent Handle. You can also attach Slide Hammers and Pro Pull.
