

IH-500

MINI INDUCTION HEATER

The IH-500 is the answer to your quick, portable and precise induction heating needs. Confidently heat metal objects with the IH-500 without heating non-metal objects such as plastics, paints and glass. This light-weight induction heater can be moved around any shop with ease weighing only 12 lbs. and can quickly heat up dents or rusted hardware. The ability to precisely deliver controlled heat makes the IH-500 ideal for paint-less Dent Repair and other routine tasks.

Features:

Portable & Lightweight - This system was designed to go anywhere in the shop. It's portability and lightweight will make it the go-to product for heating in any shop.

Quick Setup To Start Heating - The IH-500 is easy to use. Turn it on, select your level of heating and start heating. The ease of use is one of it's biggest perks.

Ideal Paint-less Dent Repair - Remove small and minor dents without having to remove paint. No unnecessary sanding or paint removal. Just start heating and remove dents.
