

The PR-3 Auto generates precise current and time to prevent damage and corrosion to the backside of the workpiece. The PR-3 Auto senses when the pull key has made contact with the material and automatically welds the key to the piece being repaired. The Auto feature is very quick and user friendly.

FEATURES:

Auto Weld

Auto senses & welds when it makes contact with the workpiece, saving time and hassle.

T-Dent Handle

Provides additional access and mobility to apply pull keys tightly together.

Versatility For Any Job

With the turn of a wing nut, you can easily switch to single-sided welding applications including washer nut & bolt, nail, rivet, stitch & more.

Technical Specifications

Input Power:	1 Phase 208-230V or 400V
Input Amperage:	24A
Input Cable:	30' (9m)
Output Amperage:	2,000A Max (at tips)
Welding Cable:	8' (2.5m)
Welding Cable/T-Dent:	8' (2.5m)
Dimensions:	18" x14" x12"
