

Glue Tab Dent Repair Kit comes with a carrying case for ease of storage and transport throughout the shop.

Dent repair just got easier with another Pro Spot innovation. Fix major dents with no heat input. This is crucial when repairing new, advanced, heat sensitive materials such as HS steel and aluminum. They demand new processes to repair these materials with little or no heat input and the Pro Spot Glue Tab Dent Repair Kit is the answer. It will help with your dent repair process by cutting repair time by avoiding welding or arc procedures.

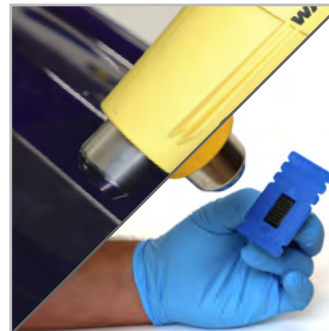

Benefits:

- Works on Aluminum and Steel
- Works directly on painted materials. No need to grind
- Multiple Style Pull Accessories for any dent
- Reusable Pull Tabs
- Safe for Electronics and Computers
- No Panel Removal required
- Eliminates any Backside Corrosion
- No Burn Through and No Welding

APPLIES IN 4 EASY STEPS!

1 Plug in the glue gun and let it heat up while you prepare the dent and materials.

3 Heat up the panel and the tab to remove remaining moisture or contaminants from the panel and the plastic pull tab.

2 With 91% alcohol, clean the area you plan on repairing.

4 Apply glue to the pull tab and set it on the dent in the area you wish to pull.
