

## NEW ADDITION TO VAC-U-PULL

The Pro Spot Vac-U-Pull system, with its Lever Bar and optional Anchor Plate, provides a versatile solution for a wide range of automotive repair applications. The Anchor Plate offers stable attachment points for chains and other devices, making it ideal for anchoring, pushing, and jacking operations. The Lever Bar enhances dent pulling, featuring an adjustable chain lock and a pivoting fulcrum, enabling technicians to work from various angles to meet specific repair needs. Paired with the Vac-U-Pull system, this setup delivers enhanced functionality and flexibility, supporting current repairs and adaptable for future repair needs.

## FEATURES AND BENEFITS:

- **Versatile Repair Solution:** The Pro Spot Vac-U-Pull system adapts to a wide range of automotive repair tasks.
- **Anchor Plate Stability:** Provides secure attachment points for chains and attachments, offering a stable base for anchoring, pushing, and jacking.
- **Enhanced Dent Pulling:** Lever Bar features an adjustable chain lock and pivoting fulcrum, allowing technicians to work at multiple angles.
- **Expanded Functionality:** This integrated system supports current repairs and offers flexibility for future repair options.
- Available as a retrofit kit for VAC-U-PULL-XL.
