

IH-5200

Induction Heater

Quickly & Safely Heat Materials

The IH-5200 Induction Heater features digitally controlled induction heating up to 5.2kW. The IH-5200 breaks down adhesives through indirect heating of steel and aluminum panels, detaching them easily and safely in seconds. It removes seized bolts, graphics, glass, realigns frame rails and much more. Safer and more precise than a torch, the IH-5200 saves the shop time and money.

Features:

Digital Control

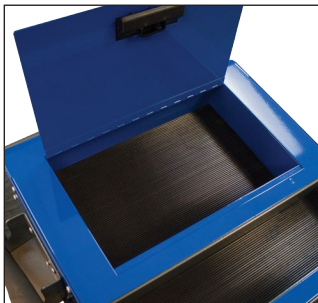

Use digitally controlled power levels for different applications.

Water-Cooled Torch

For improved duty cycle, the torch is water-cooled all the way to the head. The torch is also electrically isolated for safe, reliable operation.

Safety Shut-off

The IH-5200's safety feature automatically shuts off the machine to prevent overheating.

Top Shelf for Extra Storage

Water Coolant Level Indicator

Applications:

- Fast & Localized Heating
- Adhesive/Decal Removal
- Glass/Bonded Panel Removal
- Easy Removal of Rusty Bolts/Linkage
- Removal of Undercoating
- Stress Relief

Technical Specifications

Input Voltage:	Single Phase 208-240V 50/60Hz
Output Power:	5.2kW
Adjustment Range:	20% - 100%
Dimensions:	24.5" x 31" x 41"
Weight:	353lbs (160kg)
