

INVERTER PLASMA CUTTER PR-111

This lightweight plasma cutter works on any 110 volt power source (including generators) and provides clean and smooth cutting on all ferrous and non ferrous materials. Production cuts up to 10 ga, with sever capability to 1/4".

Pro Spot's PR-111 Plasma cutting system utilizes inverter technology ensuring a clean and stable plasma cutting stream. The PR 111 is a portable, single-phase, microprocessor controlled plasma cutter equipped with a cutting torch. Get quality cuts on all ferrous and non ferrous materials such as steel, stainless steel, aluminum, copper, brass, etc. This is the ideal machine for sheet metal shops, restaurant equipment installers and home workshops.

This unit comes complete with plasma cutter, cutting torch and extra torch consumables.
