

Pro Pull Complete

Dent Repair System

PRO SPOT
QUALITY WELDING SYSTEMS

The Pro Pull Complete utilizes the all new PR-3 Auto to generate the precise, High Power/Low Weld time needed to prevent damage to the corrosion protection on the backside of the panel.

The PR-3 Auto senses when a weld tip or pull key has made contact and welds automatically after a short delay. The Auto feature is quick and user friendly due to the fact that it does not weld instantly like other higher priced systems on the market. The Pro Pull Complete has all the accessories that you will need to make the repair fast, large or small.

Features:

Auto Weld - Auto senses when a weld tip or pull key makes contact with metal.

The T Dent Handle - Used with Auto Welding. With the turn of the wing nut, all electrodes are compatible with the T Dent Handle. You can also attach Slide Hammers and Pro Pull.

Single Sided Welding - 10 different Single-Sided welding applications give the user power and versatility to complete any job.

Precision Dent Pulling

By using weld keys, the user is able to pull a larger area all at once. It is also good for pulling out creases.

PRO PULL Complete

Precise Dent Pulling

Auto Weld Feature

The T Dent Handle is used with Auto Welding. With the turn of the wing nut, all electrodes are compatible with the T Dent Handle. The user can also attach slide hammers and Pro Spot's Pro Pull to maximize dent pulling.

Single-Sided Welding

The PR-3 Auto is capable of handling a variety of single-sided welding needs which including: washer, nut & bolt, nail, rivet and stitch.
